Skip Hire, Recycling & Waste Disposal

5 Duisky, Kinlocheil, Fort William, PH33 7AW

Due to a change in SEPA requirements, we are no longer able to accept certain items in loads of regular mixed waste at our Duisky Recycling Facility or in skips/bins. This restriction is attributed to the presence of Persistent Organic Pollutants (POPs) found in the flame-retardant chemicals of upholstered materials.

Fortunately, we have secured disposal facilities for these restricted items. However, due to the increased disposal costs, we will now implement a per-item charge. For pricing details, please contact us at enquiries@bowmanskiphire.co.uk. It is crucial to note that these items should not be mixed with regular waste; a separate collection solely for these specified items must be arranged.

In the event that we discover these restricted items among regular mixed waste, charges will apply on a per-item basis, and the entire load will incur a £320 per tonne charge. This comprehensive charge is applicable because the entire load will be considered contaminated and necessitate special disposal.

Waste domestic seating refers to any household or business seating item classified as waste. Upholstered domestic seating may contain POPs, such as:

- sofas
- sofa beds
- armchairs
- kitchen and dining room chairs
- stools
- footstools
- home office chairs
- futons
- bean bags
- floor cushions, and sofa cushions.

This includes any component made of or containing leather, synthetic leather, other fabric, or foam.

We apologize for the short notice, as this legislation change has recently come into effect.

Many Thanks

Michael Bowman
